

Embedded Track Systems

Polycorp is a global supplier of embedded track systems that prolong the lifespan of any road surface. Our products limit the destructive effects of impact, vibration, and stray electric currents while also dramatically reducing rail noise. Customers benefit from our extensive product catalogue, superior technical support, and decades of experience in the rail industry.

Polycorp pioneered the concept of **EPFLEX™** Railseal as an interface between the road surface and the rail at level grade crossings. Polycorp's patented **EPFLEX™** products have helped railroad and road authorities stretch their maintenance budgets.

Recognizing the need for products to control track stiffness, rail noise, and stray electric currents. Polycorp engineers developed the **TrackJacket®** line of dynamic track support systems that meet every need, from one end of the track to the other, and everything in between.

One System, One Supplier, One Responsibility

Innovation

Polycorp continually improves and introduces new products to meet customer needs. Our knowledgeable in-house Technical Department and hands-on field presence allows us to quickly create focused solutions to your specific project challenges. **Polycorp is the industry leader with over 30 years of job experience to prove it.**

Quality

Polycorp quality begins with our **ISO 9001:2008** Certification and ends only when the job is in revenue service. We have quality systems and the latest testing equipment to ensure our material exceeds your needs and satisfies your customer's requirements.

High Quality = Reduced Risk

Technical Support

Polycorp clients benefit from decades of experience in engineered products. This experience is your advantage. Our sales and technical personnel are always available to understand, design, and engineer a product and installation program suited to your needs. Polycorp offers on-site support and is an **extension of your team, when you need it most.**

Solutions

You need answers – and you need them now. The Polycorp engineering team creates embedded track systems that exceed specifications, with a focus on ease of installation, to provide tangible benefits for every stakeholder. Polycorp has the people, facilities, testing, and products to produce the materials you want. All backed by the service you need. Wherever you are, you can count on Polycorp **to be there for you over the entire build.**
