

POLYCORP 021052

Chloroprene Tack Cement

December 2016

Polycorp 021052 Black chloroprene tack cement used for bonding chloroprene rubber and other synthetic rubber lining to metal in lining operations. It provides good green tack and is suitable for use with autoclave, open steam.

TYPICAL PROPERTIES:

Composition

021052

A mixture of polymers, organic compounds and fillers dissolved in an organic solvent system.

Color

Black

Solids content

23.0 ± 2.0 %

Viscosity Zahn Cup #3

90-120 sec

Theoretical Coverage

200 sq. ft/ gal

Shelf Life

6 months from date of manufacture, unopened container
70°F- 80°F (21°C - 27°C) storage temperature

Mixing:

Thoroughly stir adhesive before use. During application stir occasionally to keep solids uniformly dispersed.

Application:

Polycorp 021052 cement can be applied by brush or roller. Cement should be dry to the touch before rubber lay-up. When not in use, cover containers to prevent solvent loss. Please refer to section 6 of Application manual for general application instructions.

Safety:

Before using this product please refer to the Safety Data Sheet (SDS) for safe use and handling.
