

RAIL

Polycorp and Buy America

Fully Buy America Compliant

Polycorp is a global supplier of embedded track systems that prolong the lifespan of any road surface. Our products limit the destructive effects of impact, vibration, and stray electric current while also dramatically reducing rail noise. Customers benefit from our extensive product catalogue, superior technical support, and decades of experience in the rail industry.

Polycorp is proud to announce that all Transit Embedded Rail Products and EPFLEX® Railseal Interface are fully **Buy America** compliant.

Made in America for America

Polycorp Rail products are now available to all Federally Funded Infrastructure programs. It is easier than ever to meet the required criteria and project targets. One call to Polycorp, the North American leader in cost effective Embedded Track and Grade Crossing materials, will meet all your needs. No matter if your project uses the stray current benefits of the **TrackJacket®** system for Transit, or the proven field history and demonstrated cost savings of Polycorp **EPFLEX® Railseal & Eplock® II** clips, our products are readily available.

For more detail on how Polycorp Products can help you meet your **Buy America** job requirements, contact the Polycorp Sales and Engineering Team **1-800-265-2710** or visit www.poly-corp.com
